

MSME unit information format for calling design experts inquiry

Project Title : Integrated Thin Client Terminal (ITCT)
Banking Kiosk (BK)

MSME Unit Name : VXL Instruments Ltd
Ksense Technology Pvt. Ltd.

Contact Person : Madireddy V. Nagaraj, MD
Ph. No : +91 98442 444 44
E-mail : nagarajm@vxl.net , nagaraj@ksense.biz

Industry Type and products : VXL - Manufacturer & Exporter of Thin Clients.
Ksense - Complete Solution Provider & Projects

Project Brief : ITCT - There is a requirement to design a rugged Thin Client based Desktop which can be used reliably in harsh Indian environments like Transport Ticketing Counters, Billing Retail Counters and Industrial Monitoring locations. In some locations, a free standing Kiosk design also may be required.

BK - This product is a Banking Kiosk which will be located in non-banking locations and typically in non-urban locations. Besides designing in ruggedness, there is greater need to take care of an intuitive user interface both in the enclosure design as well the On-Screen Menu design to cater to a largely ill-literate user community. Other considerations will include ease of safe transport and easy installation and routine and break-down maintenance.

Designer Preferences (If any) : None at the moment. Would prefer someone with experience in enclosure designs coupled with engineering knowledge for simple manufacturing. User interface rules & ergonomics are added qualifications.
